Data Science Portfolio

PROJECTS

- Starbucks Customer Segmentation using K-Means Clustering
- Breast Cancer Detection in Mammograms using Convolutional Neural Networks
- Classifying Passive vs. Active Revenge in Related Subreddits using NLP
- Predicting Ames, Iowa Real Estate Prices with Linear Regression

EXPERIENCE

Well Data Labs, Denver, CO —*Data Research Analyst & Support Analyst*

FEB 2019 - MAY 2021

- Applied best practices in statistical analysis to drive business value and ROI to all stakeholders both internally on the Data Science team, across the organization and externally to clients.
- Validated, tested, and monitored machine learning models' performance and functionality. Standardized accuracy metrics and optimized testing workflow.
- Automated high-frequency time series data wrangling and analyses using Excel VBA and Python. Integrated python scripts in custom built dashboards.
- Coauthored a peer-reviewed paper, client case studies, and blog posts that address key market needs while proposing data-driven solutions and strategies.
- Built 4 data reviews for use in board meetings and presented them to the entire company of 35+ people during quarterly all-hands meetings.
- Tracked product usage, deployed customer retention initiatives, and developed technical documentation with every new release.

Reliance OFS (formerly FMC Tech), Denver, CO — *Log Analyst*

AUG 2015 - FEB 2019

- Due to newly acquired technology and my previous pulsed neutron expertise, I implemented a new data service, increasing revenue and bringing in 3 new clients.
- Trained 2 new analysts on all department functions and created instructional technical manuals, reference materials, and workflows.
- Assessed wellbore integrity and identified potential casing and cement issues to maximize the efficiency of field operations while ensuring safety.

Baker Hughes, Denver, CO — *Geoscientist / Team Lead*

APRIL 2013 - AUG 2015

- Led the Cased Hole Petrophysics team of 5 people within the Reservoir Development group. Resulted in 600+ successfully delivered projects yearly.
- Processed and analyzed data using various petrophysical techniques and technologies to provide and present solutions to clients.
- Vital internal role mentoring and teaching data processing techniques, expanding the company's Cased Hole business internationally to South American countries.

EDUCATION

General Assembly
Data Science Immersive
JUNE 2021- SEPT 2021

University of Vermont
B.S. Geology, Minor Studio Art
AUG 2008 - MAY 2012

SKILLS

Core Competencies:
Analytics + Research
Machine Learning
Project Management
Technical Writing
Presenting

Software: Computational notebooks (Jupyter) | Data visualization (Spotfire & PowerBI) | CRM (Salesforce) | Code repos (GitHub & BitBucket) | Software product planning (Pivotal Tracker) | Product UX (Pendo) | AWS | Adobe Creative

LANGUAGES

Python | SQL | Excel VBA | Bash | Hebrew | French

PAPERS

SPE 204145 (2021)
Employing a Suite of Machine-Learning Algorithms in a Holistic Approach to Trouble-Stage Recognition and Failure Diagnostics
